

System Requirement Specification for Dareeya

(A Travel and Tourism on Line Portal)

By, Heuristic Communication Private Limited
www.hucpl.com

PROJECT SCOPE

The complete project scope is defined on the project “Dareeya” understanding documents received.

PURPOSE

The purpose of this document is to present a detailed description of the Travel and Tourism management System. It will explain the purpose and features of the system, the interfaces of the system, what the system will do, the constraints under which it must operate and how the system will react to external stimuli. This document is intended for both the stakeholders and the developers of the system.

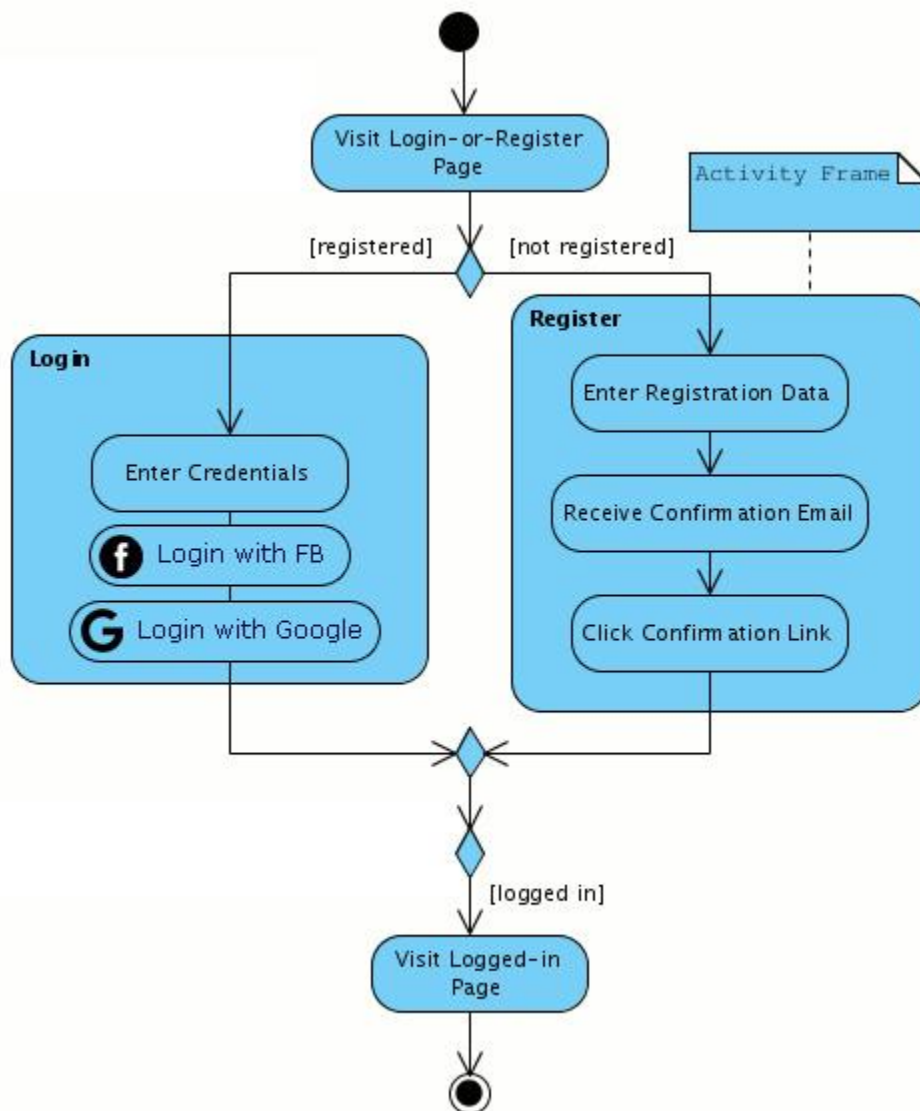

PROJECT SCOPE

The Travel and Tourism Management System project is an implementation of a managing Travel and Tourism website which helps the customers to search the availability of various tourist places and Commercials of various packages in particular places, along with the different packages available with the reservations. This project also covers various features like online registration of the users, modifying the details of the website by the management staff or administrator of the website, by adding, deleting or modifying the customer details or packages information. In general, this website would be designed to perform like any other Tourist management website available online.
